

TF

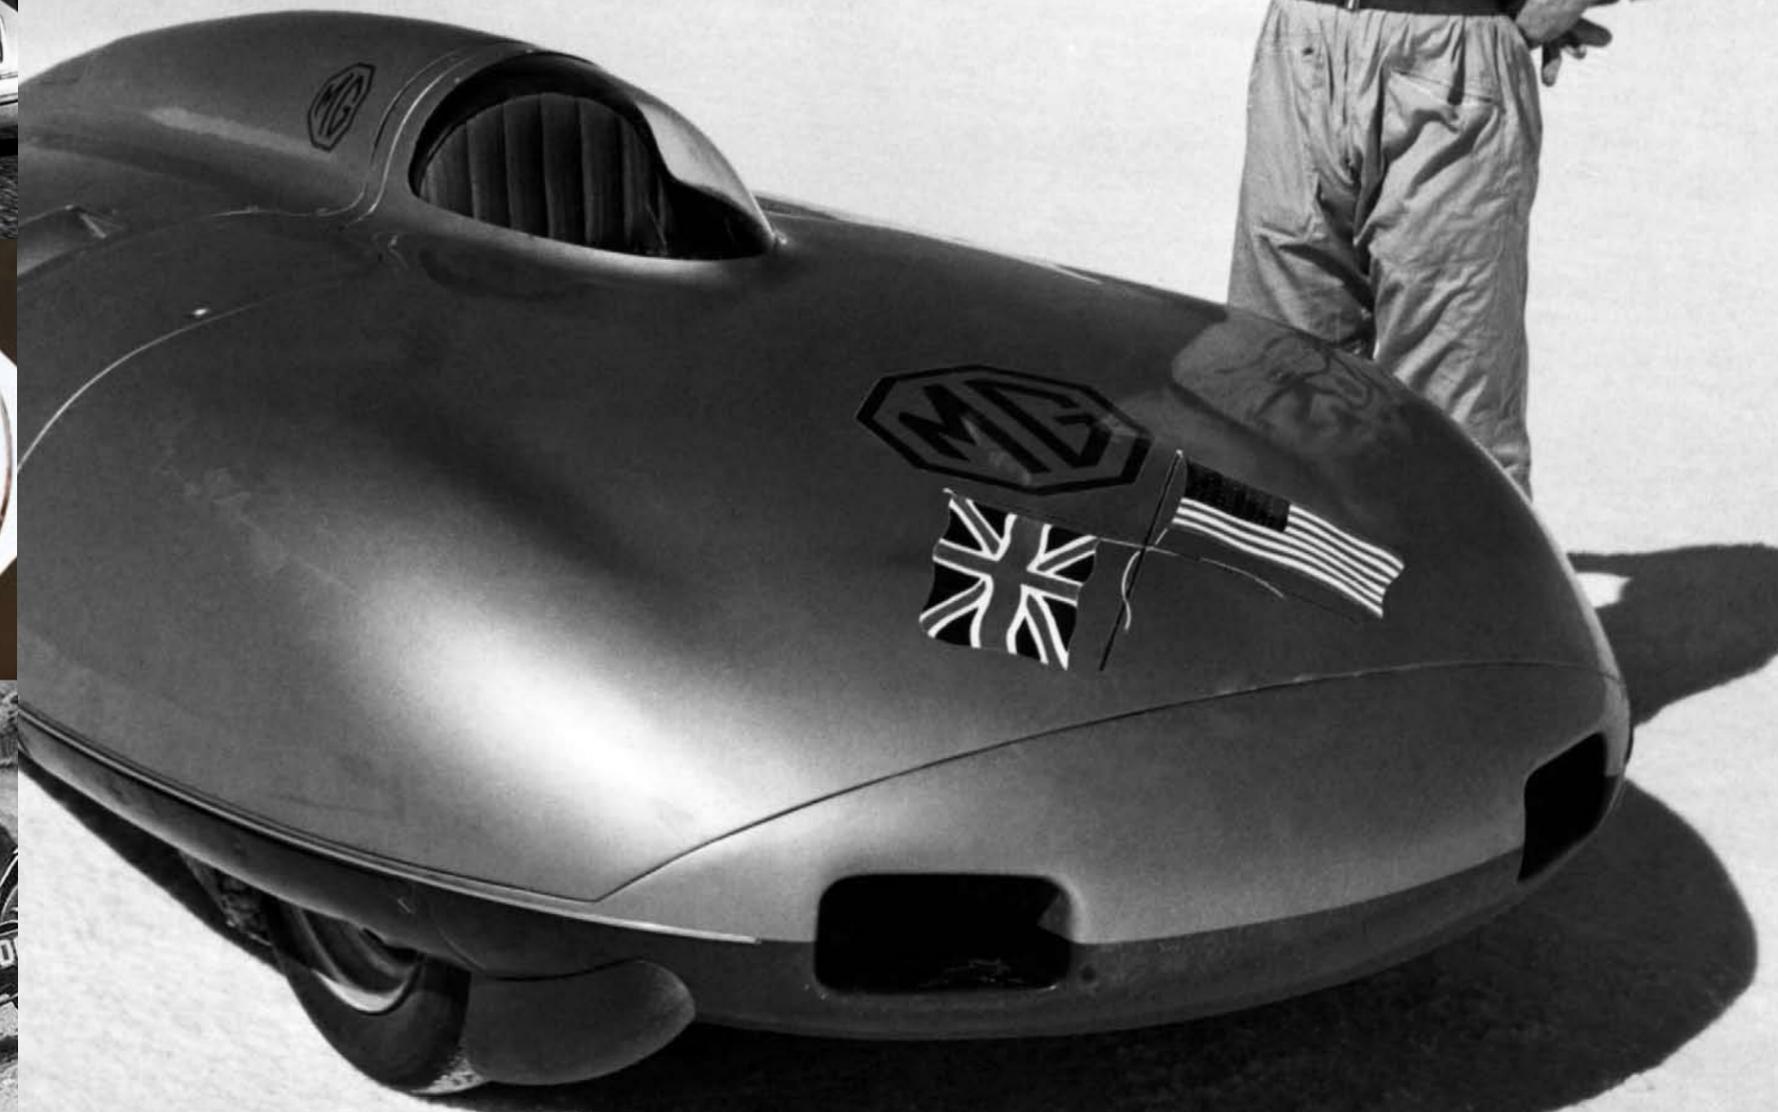

FUN
IS BACK

The MG journey begins back in 1924, when Morris Garages established the MG brand by building sports car bodies on Morris chassis. The legendary reputation for sports performance was born.

Since the 1920s MG has produced some of the most remarkable, popular sports cars of all time. Cars that are synonymous with pure exhilaration and driving pleasure. Today a stronger, reinvigorated MG is back and is under new ownership. MG. A new future. **A NEW JOURNEY.**

**Reach for the sun.
For people whose glass is always half full.
And who don't stick a toe in the water;
they jump right on in.
For free thinkers.
And free expression.
And self-starters.
And absolutely everyone with a lust for life.
People who leap straight out of bed,
first thing they put on is a smile.
Who dare to try something different.
Ever been on a blind date?
Of course you have.
Let work become play.**

Free-spirited. Individual. Head-turning. And most important of all, sheer driving delight.

Every MG is precision engineered to deliver total driver engagement. In fact, the sports car bloodline and racing DNA pulses through every component and every detail.

It is a combination of craftsmanship and tradition, pure design and intent, that culminates in the MG TF.

It comprises the optimum configuration for the sports car: mid-engined, with power directed to the rear wheels.

And it is a choice between two versions of a fabulous car: MG TF 135 and the Limited Edition MG TF LE500.

MG Fun is Back

MG TF is all about driver satisfaction. A car that delivers nothing short of undiluted delight.

The classic mid-engined rear wheel drive layout delivers superb roadholding and accurate, responsive steering thanks to the near 50:50 weight distribution between the front and the rear wheels.

In short, great handling and great acceleration together with great feedback and turn-in through challenging bends.

And that's all before the suspension is taken into account. The race-proven design with independent front suspension and multi-link rear ends gives added control on acute cambers, keeping the wheel upright. The result is that more of the tyre stays in contact with more of the road for added grip.

What's more, the compliant suspension set-up means that long-distance comfort

and refinement never compromises sports handling.

There's a heated glass rear screen for all weather visibility. The MG TF is no fair-weather-only friend.

For all-year-round practicality and versatility a smart Heritage hardtop comes as standard on the MG TF LE500 and is available as an option on the MG TF 135.

Not to mention rear parking sensors on the LE500 which assist when manoeuvring in tight spaces.

Both cars boast 4-pot calipers on the ventilated front disc brakes and the MG TF LE500 features 16 inch 11 spoke alloy wheels, air conditioning and discreet LE500 badging.

Yes, it's all there, all in the right place.

There's only one thing missing. You.

DF VX100+

MG Driving Exhilaration

At the heart of every MG TF is the 1.8 litre multipoint, fuel injected petrol engine. It provides unadulterated, fuel injected adrenalin. 100 percent exhilaration.

This lightweight, responsive engine blends refinement with smooth power that is always on tap just under the driver's right foot. While the sophisticated engine management system means that MG TF fully complies with Euro IV emissions regulations.

With excellent all round performance, you'll be reassured to learn that the powerful brakes are fitted with electronic ABS.

Oh, and it sounds fantastic too. That rich, eager roar of a true sports car.

It looks even better. The famous classic lines, the assured sure-footed stance and now a restyled front with mesh grille, halogen projector-style headlamps and sporty twin exhaust pipes at the rear.

Let yourself go. And go. And go.

TF 135

The interior of the **MG TF** is one of timeless sophistication. Intimate. Driver-focused. It instantly puts you in command. Controls are within easy reach, sport-style instruments are clear and relay essential information unambiguously.

TF LE500

Sports-style seats as standard - leather on the TF LE500 - offer security and lateral support through the most challenging bends.

In MG TF LE500 models you may well be drawn to the unique Limited Edition badging: each car an individually numbered one-off collector's item. As an item of high intrinsic and long term value, each TF LE500's provenance is assured by being supplied with an individually numbered Certificate of Authenticity.

With elegant piano black lacquer finish on the console and on door inserts, every MG TF interior is an environment dedicated to driving pleasure. Just add your own music track on the CD/tuner (complete with MP3 compatibility on the MG TF LE500).

And you're away. **On cloud nine.**

Model shown with optional leather seats, air conditioning & passenger airbag.

TF Exterior colours

There are 13
stunning colours to
choose from including solids,
metallics and mica-tallics, 5 being unique
to the MG TF LE500.

Make it yours.

MG TF LE500

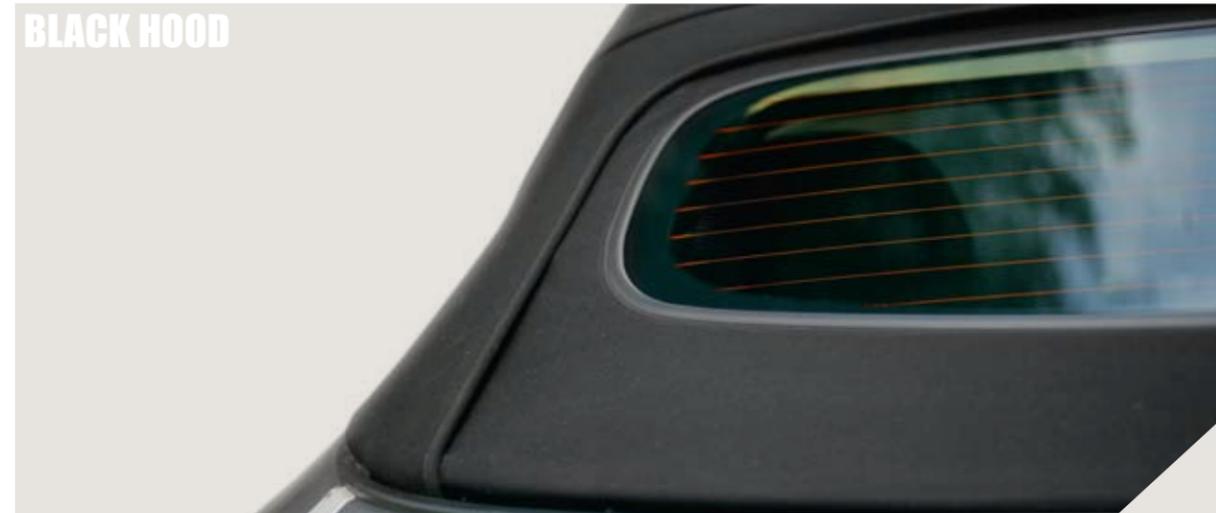

MG TF 135

Metallic, Pearl and Mica-tallic finishes are extra cost options on TF 135

BLACK HOOD

MG TF Features

TF 135 SPECIFICATION

Mid engine, rear wheel drive configuration

Engine and Transmission

N Series, 1.8 16v 4 cylinder dohc

Engine Capacity: 1796cc

Power: 135PS/99.3kW @ 6,750rpm

Torque: (NM/rpm) 165 NM @ 5,000rpm

0-60mph: 8.4 secs

Top speed: 127mph/205kph

Five speed manual gearbox

Brakes

Front: ventilated front discs and 4-pot calipers

Optional as part of the 'dark' pack on TF135

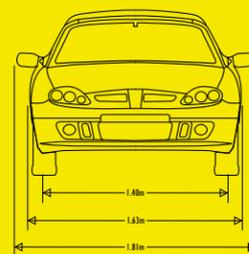

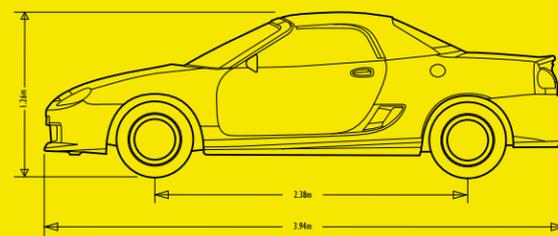

16" 11 spoke alloy wheel in shadow chrome finish. Standard on TF LE500 (except on black and orange cars). Optional on TF 135

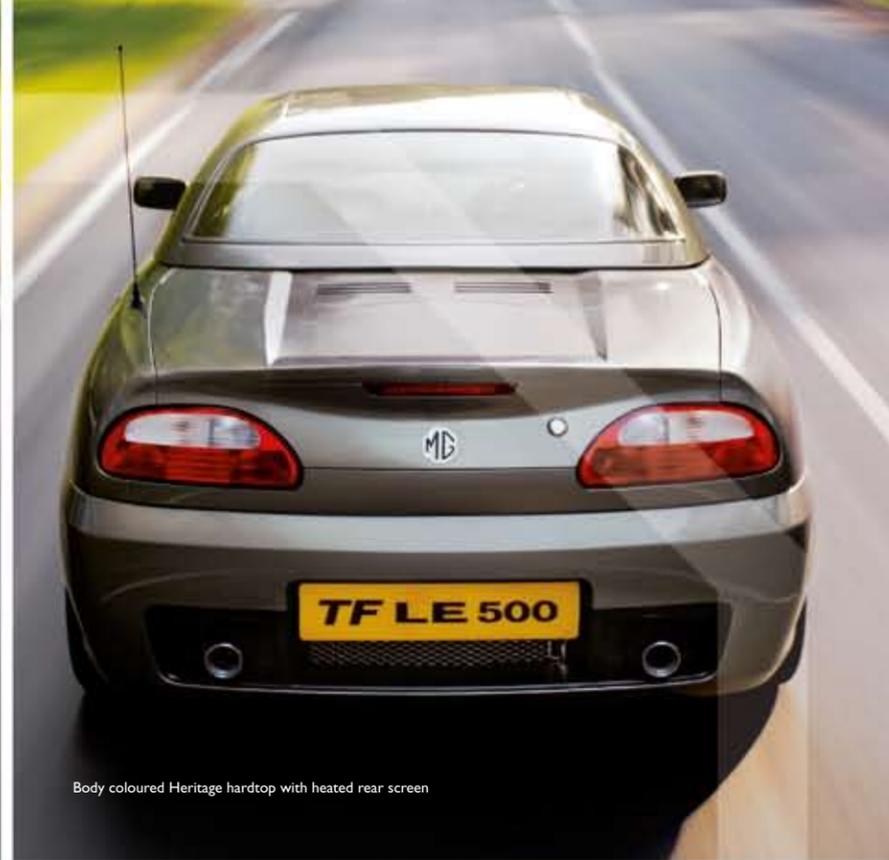

16" 11-spoke alloy wheel. Standard on TF135. Not available on TF LE500.

MG TF 135 & LE500 fuel consumption - mpg (L/100km): Urban: 25.4 (11.1), Extra Urban: 46.3 (6.1), Combined: 35.8 (7.9). CO₂ mass emission (combined) 185 g/km. The fuel consumption figures were obtained in tests carried out in line with the Passenger Car Fuel Consumption and CO₂ Emissions Information Regulations 2001 (Reflecting EU Directive 80/1268/EEC as amended by 2004/3/EC). However under normal use, a car's actual fuel consumption figures may differ from those achieved through the test procedure, dependant on driving technique, road and traffic conditions, environmental factors and vehicle condition.

Add even more style and practicality to the MG TF 135:

Choose an optional wind stop and body coloured hardtop to make the TF 135 even more practical. Both are fitted as standard on the TF LE500.

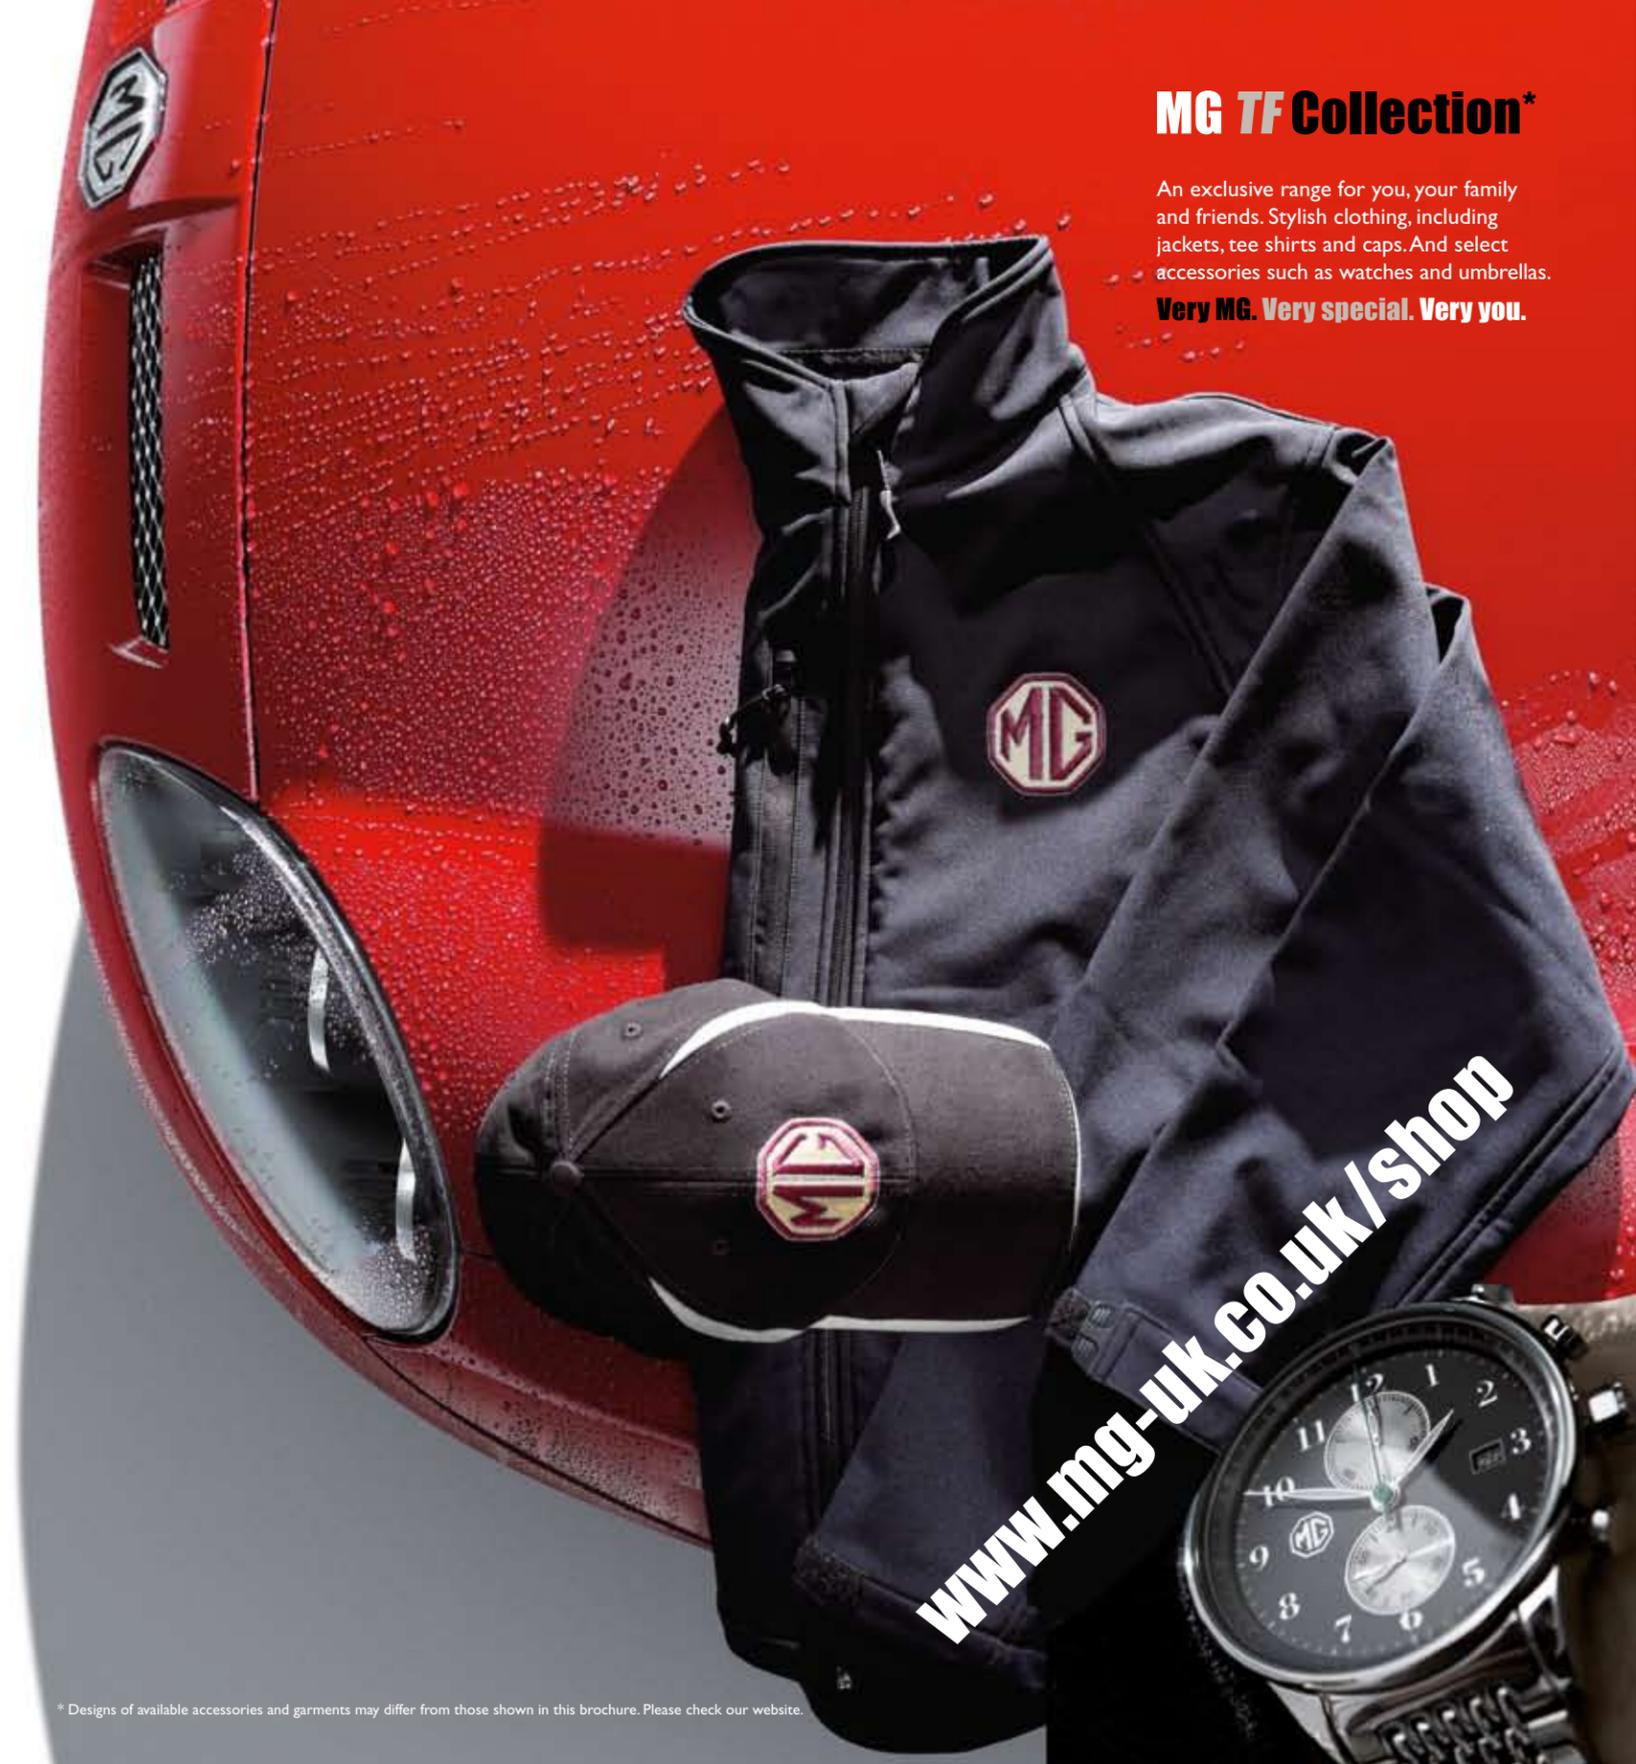

Body coloured Heritage hardtop with heated rear screen

MG TF Collection*

An exclusive range for you, your family and friends. Stylish clothing, including jackets, tee shirts and caps. And select accessories such as watches and umbrellas.

Very MG. Very special. Very you.
